

**Security is your first  
Talk2M benefit!**

**Certified IIoT Cloud  
for Remote Solutions**

# ISO27001 certified

A highly demanding Information Security management system (ISMS) for the cloud connectivity platform Talk2M

## ISO27001 is an internationally recognized security standard

The ISMS statement of applicability specifies the roles and responsibilities of HMS in managing all aspects of business continuity and security of the Talk2M service

### The Talk2M ISMS:

- Guarantees that all security issues/threats are identified and adequately handled
- Establishes regulatory compliance and best practice alignment
- Continuously improves the organizational services
- Identifies vulnerabilities and security threats

# ISECOM STAR certified

Industrial strength security for the cloud connectivity platform Talk2M

## STAR\* ensures a high security level within our Talk2M platform

Talk2M security environment is regularly tested to ensure the highest security level of our platform, and to offer the most secure solution to our customers

- Auditing and penetration testing are performed on the remote connectivity services within Talk2M, including M2Web, eCatcher, and VPN servers
- Open source testing methodologies such as **OSSTMM** (Open Source Security Testing Methodology Manual) and **OWASP** (Open Web Application Security Project) are utilized for full transparency

\* The security of eWON's solution is regularly audited by independent organizations and eWON / HMS has obtained the ISO 27001 certifications by VINÇOTTE

\* Security Test Audit Report

# Layered **SECURITY** approach

eWON ensures high security using the "Layered security approach" also called "Defense in Depth Approach". This approach preserves information integrity and confidentiality along with information system availability and resiliency.

Policy compliance  
Network Infrastructure  
User and access management  
Traffic encryption  
Firewall  
eWON Device

## Trusted all over the world

• eWONs securely connected
